Fruit Logistica Exhibition Berlin 08-10 February

This yearly fair on the subject of salad, fruit and vegetables was a full success!

We had three well-attended days at the **Fruit Logistica** in **Berlin**. Good visitor numbers showed that our customers visit the trade fairs again, to find out about innovations.

We were able to show our visitors the efficiency of our TOMRA optical sorting machines via live transmissions. For example in the quality sorting of diced potatoes.

The THELEN-machines team presents itself together with the new responsible sales manager Peter Janssens (centre) from the TOMRA headquarters in Leuven (B).

TOMRA 5B belt sorter

TOMRA 5C free fall sorter
