

CIBUSTEC trade fair in Parma Italy 24-27 October 2023

The CIBUSTEC trade fair in Parma was a great success. We would like to thank all visitors during the four days of the trade fair.

The Thelen team was on site to keep an eye out for the latest machine innovations for our customers.

At the same time, we personally introduced our "Service Competence Team" to our partners. [Service Competence Circle - THELEN-machines](#)

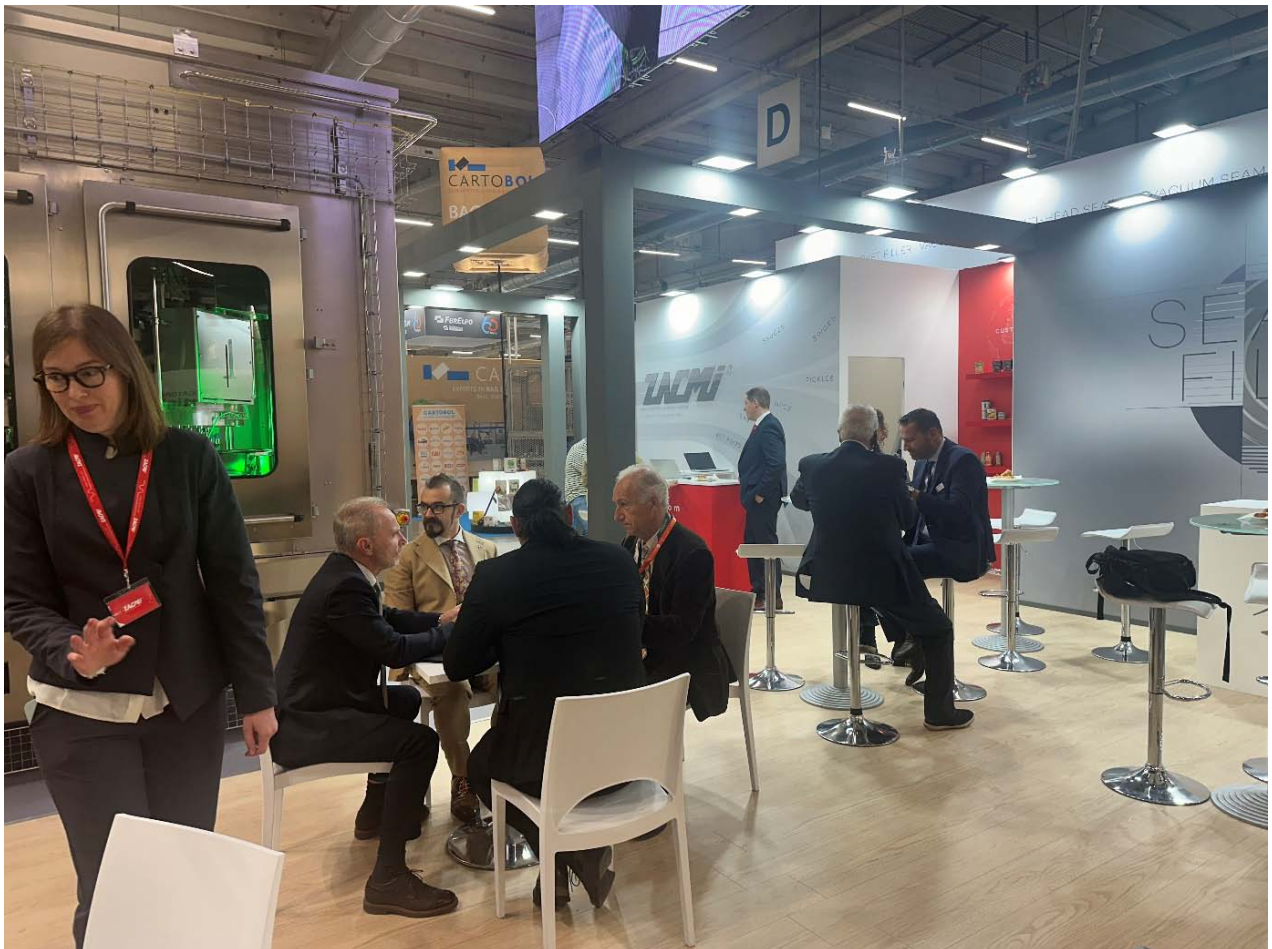

- Zacmi company presented the latest development in the field of filling pasty products into cans at its stand, with a synchronized can sealing machine for 700 cans/min.
- The number of visitors to the trade fair stand was correspondingly large.

- ZACMI filling machine in clean design with full CIP option and innovative filling technologies.

- There were insights into the fully automatic and temperature-monitored dual-circuit oil circulation lubrication of the new Zacmi can sealing machine.

- Many interesting conversations with existing customers and many new interested.

- TOMRA provided information about the latest innovations in the areas of optical sorting and steam peeling.

The new TOMRA 5C

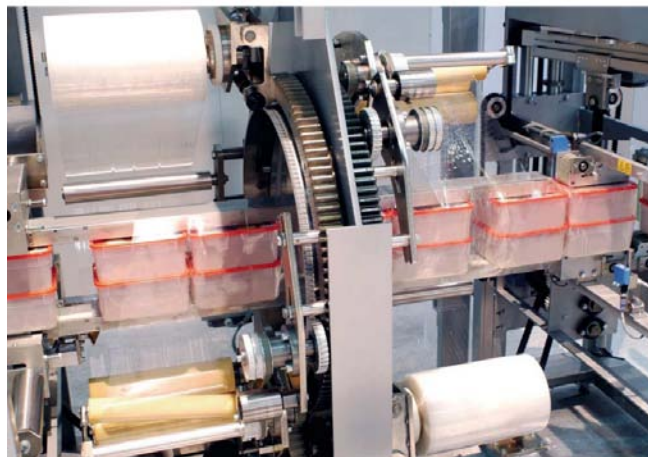

TOMRA steam peeler for carrots

- The ROBOPAC Group has presented its complete program.
- There were innovations in the packaging machines for products on trays and foil or environmentally conscious full cardboard versions.

Serie FW 200 Stretch-Folienwickelmaschine

- A new stretch film wrapping machine from the FW200 series was introduced from the ROBOPAC product line "MEYPACK" from Germany.
